PROFESSIONAL EXPERIENCE

XYZ Corporation

2001 - Present

DIRECTOR ~ Global Data Management, GDM

- Chief of staff role for GDM division comprised of over 200 staff; 29 full-time employees and 180 contractors.
- Member of the Global Technology Engineering Leadership team responsible for driving business strategy, talent and financial management for the division in alignment with business objectives.
- Manage and oversee multi-million dollar division budgets; implemented tight financial process and controls allowing the division to manage our budget collaboratively as a leadership team and within our targeted financial goals.
 - Managed a \$30M divisional budget in 2009 within 1 percent of budget target.
 - Managed a \$25M divisional budget in 2008 within 6/10th of a percent of budget target.
 - Implemented cost controls in 2007 due to multiple budget overspending.
- Lead a variety of GDM global teams focused on building a scalable framework (quality, cost, process and vendors) for GDM project delivery success.
- Direct all divisional efforts and project lifecycle initiative for 2 black belt, 15 green belt and 7 yellow belt projects.
- Act as Global Continuous Improvement Portfolio Manager for the Business Technology Shared service.
 - Implemented a contractor on-boarding process for our division managing financial, procurement and legal requirement saving \$268k in 12 months.
 - Implemented a refined software development process saving \$92k in three months.
- Develop and lead global initiative for metrics and reporting for GDM and the rollup to the Worldwide Technology Division.
- Execute the delivery of technical solutions and business strategies for a portfolio of projects running concurrently in the finance, research, development, procurement, human resources, commercial, sales and emerging market business domains.
- Identify and establish a mixed vendor environment for lower cost alternatives in providing solutions for GDM; inclusive of onshore, near shore and offshore service models.
- Direct all staff, vendor and contract resources; areas of process engineering, financials, testing and operations.
- Ensure divisional compliance for products, contracts, statements of work and engineering processes; responsible for vendor and contractor compliance along with co-employment education.
- Drove and continuously oversee workforce planning and talent development for the entire GDM division.
- Led multiple special transition/acquisition projects for XYZ.
- Active Board of Directors member for local inner-city charter school, Crawford's Community Health and Medical Practices (CHAMPS)

ASSOCIATE DIRECTOR

Data Warehousing & Business Intelligence (DW&BI)

- Leading key team member on the DW&BI leadership team focusing efforts on building services, operating and organizational models, and project activities centering on the management of the data warehousing group.
 - Implemented a testing strategy and resource model saving our research business line \$300k in 2006.
- Conceived and delivered technical solutions and strategies for a portfolio of projects running concurrently in the Finance, Research, Development, and Procurement business domains.
- Built and tested solutions that met FDA compliance regulations under the One IT organization.
- Developed and maintained an onsite/offshore testing strategy and service model inclusive of unit planning, design, integration, and system and production qualification (OQ and PQ) testing.
- Launched and established a quality assurance function for the Data Warehouse and Business Intelligence group; led in the building of the strategy structure, budgeting and resource model from the ground up to meet CMMi Level 2/3 attributes.
- Participated as a global team member in the data warehouse counsel for XYZ.
- Strategically led the process engineering team focused on business and SDLC strategies, implementation and adherence utilizing a CMMi and Six Sigma frameworks; adapted a roadmap, process improvement plan along with metrics and auditing mechanisms to improve business operations with a focus on data warehousing needs.
- Acted as subject area expert in data warehousing technologies and software development engineering practices.
